#### D. Reading a poem

1. Before you read the poem below, look at the title. What do you think it will be about.

##### I wonder

I wonder why the grass is green,  
why the wind is invisible,  
who taught the birds to build  
the nests? and also made  
the trees to stand still and rest.

Who paints the rainbow in the sky?  
And who makes the clouds up high?  
Who forms all the stars in the sky?  
and when the moon is not round,  
where can the other piece be found?

*Extract from Journey to Jo'burg (Chapter 6: A New Friend)  
By Beverley Naidoo*

As they turned towards the road, there was a bus with the word 'PARKTOWN' in big letters on the front. It was slowing down a little as it went up the road and the doors were opening. Through the front window they could see the driver was black.

### NOTEPAD

Stories usually follow the following structure:

**Exposition** – The scene is set and we are introduced to some of the characters.

**Rising action** – Conflict is introduced which upsets the ordinary life of the characters. Conflict is a very important part of a story: we want to know how the problems get solved. This becomes even more interesting when we learn about the characters and the trouble they are in. The rising action builds ...

...the most exciting part of the story.

ONDERWYSERSGIDS	9781920604875

**Graad 7**

**Doeltreffende en effektiewe gebruik van goedere en dienste en herwinning**

**Nuwe Woorde**

**effektief:** om jou beoogde resultate te behaal as 'n taak verrig word

**doeltreffend:** om 'n taak op 'n georganiseerde en toepaslike manier te verrig

**fossielbrandstowwe:** brandstowwe gevorm deur natuurlike prosesse soos plantte wat vrot

**aardverwarming:** styging in die aarde se temperatuur

**klimaat:** die weertoestande wat in 'n gebied oor 'n lang tydperk voorkom

**verkooprys:** die koste van 'n produk plus wins

Beide verbruikers en produsente gebruik goedere en dienste. Om goedere en dienste **effektief\*** en **doeltreffend\*** te gebruik, beteken om goedere en dienste te gebruik met 'n minimum van vermorsing, koste en moeite.

As verbruikers, kan ons die goedere en dienste wat ons verbruik, effektief en doeltreffend in ons huishoudings gebruik. Een van die grootste kostes wat huishoudings aangaan is vir water en elektrisiteit. Beide hierdie dienste kan gemonitor word sodat elk die water en elektrisiteit gebruik wat regtig nodig is moet huisbewoners byvoorbeeld seker maak dat ge die stort behoorlik toe is en lekkende pype onmiddellik word, en die warmwater geiser met 'n hittebestanddeel word en net aangeskakel word wanneer warmwater nodig is. Wanneer energie bespaar word, spaar jy nie net geld nie verminder die aanvraag na **fossielbrandstowwe\*** soos water en natuurlike gas. As minder fossielbrandstowwe gebruik word, dan word dit minder koolstofdioksied in die atmosfeer. Dit help ons om **aardverwarming\*** en lugbesoedeling. Nog 'n manier om energie te bespaar is om skadubome te plant en jou huis 'n lige kleur te verf om 'n warm **klimaat\*** bly, of 'n donker kleur as jy in 'n koue klimaat leef.

Kos is nodig vir alle huishoudings, want ons eet daagliks kos en doeltreffende verbruik van voedsel vereis dat huishoudings gepaste wyses stoor voordat dit verbruik word om te sien of kos sleg word. Baie winkels sprinkel water oor kos om dit vars te laat lyk. Dit is raadsaam om daarop te let dat die vlo sal vers.

**Unit overview**

- Participation in a fitness programme

In this unit learners continue with their fitness programme through circuit training. At the end of the unit they assess their own level of improvement.

**Instructions for Formal Assessment**

Week 8 has been suggested as a formal assessment of movement performance. Make sure that you record the marks of all the learners on a class list. The assessment tool can be found on page 28 of this Teacher's Guide.

#### Group/individual activity

- Groups should consist of no more than 5 or 6 learners.
- During this activity, go round the groups and observe the participation of the individual learners in order to do an informal assessment.
- Ask the groups to discuss the pictures in terms of the negative behaviour illustrated and why it is negative.
- Learners can give feedback in a class discussion once the groups have completed the activity.
- Learners now work individually to complete the activity, following instructions in the Learner's Book. This activity could be completed as homework.

e. Which two processes take place during distillation?  
Explain what happens during each process.

**Worksheet 7.1**

**ACTIVITY 7.3 Separate ink by chromatography-**

You can use chromatography to separate the ink in a black ballpoint pen (Steps 1 to 6) or different colours of felt-tipped pens (Steps 7 to 10).

**You will need:**

- a black ballpoint pen
- different colours of non-permanent felt-tipped pens (koki pens)
- filter paper or blotting paper
- a beaker or glass
- methylated spirits
- water
- a dropper.

**Note:** Use methylated spirits as the solvent for the black ballpoint pen because the colour pigments are soluble in methylated spirits but not soluble in water. The coloured pigments in the non-permanent koki pens are soluble in water so you can use water as the solvent.

**Step 1** Use the black ballpoint pen to make a small black dot in the centre of a piece of filter paper or blotting paper.

**Step 2** Put the filter paper on top of a glass so that it covers the opening.

**Step 3** Use a dropper to carefully add a drop of methylated spirit to the black spot.

**Step 4** When the first drop of methylated spirits has spread, add a second drop. Do this until the colours have spread half way across the filter paper.

**Step 5** Draw a diagram to show how the colours have separated.

**Step 6** Record your answers to the following questions:
 

- What happens to the methylated spirits?
- What happens to the dot?
- Which colour is nearest to the dot? Explain why this is so.
- Which colour is furthest from the dot? Explain why this is so.

**OR**

**Step 7** Use a coloured felt-tipped pen to make a small dot in the centre of a piece of filter paper or blotting paper.

**Step 8** Repeat Steps 2 to 5 but use water instead of methylated spirits.

**Step 9** Record your answers to the following questions:
 

- What happens to the water?
- What happens to the dot?
- Which colour is nearest to the dot? Explain why this is so.
- Which colour is furthest from the dot? Explain why this is so.

## LEARNER'S BOOK

- Written in clear language for easier learning
- Diagrams, pictures and illustrations to support visual learning
- Provides new vocabulary and key concepts or enrichments alongside the activity

### Third-class levers

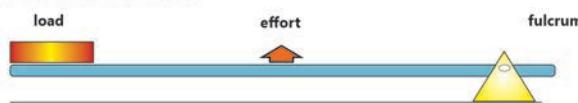

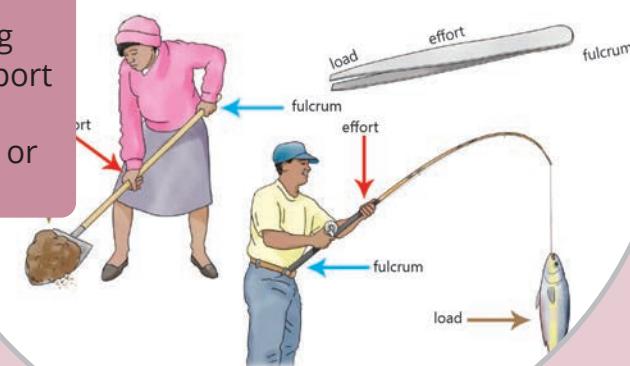

Figure 2.16 A diagram showing a third-class lever.

A pair of tweezers, a spade and a fishing rod are all good examples of third-class levers.

It is easier to move the load if you move the effort somewhere else.

## Final Assessment Tasks: Term 4

### Mini-PAT

**Topic:** Processing / Bias in and Impact of Technology

**Context:** Shelters for refugees

**Content:** Properties of materials

**Time allocation:** 6 hours

#### Guidelines

- This Mini-PAT counts for 10% of the year mark.
- Although the Mini-PAT is regarded as the application of content and concepts learnt the teacher must guide and help the learners. The approach we have taken is to help the learner through each stage. You will need to guide learners through the stages.
- Under no circumstances must the learners be given the Mini-PAT to do at home.

#### Assessment plan

The assessment plan requires the same emphasis on evaluate, design and communicate.

Use a learner checklist with the sub-headings for those things that learners are assessing so that learners track their own progress.

Assessment of the technological process should assess if the learners can investigate (find out things), design (plan), make (do)

## TEACHER'S GUIDE
